PROFESSIONAL SUMMARY

Data Analyst with 2.3 years of experience in telecom operations, automation, and business analytics at Ericsson India. Skilled in SQL, Python, Power BI, and Excel automation with hands-on experience in KPI monitoring, reporting automation, data transformation, and dashboard development. Built multiple end-to-end analytics projects across telecom, retail, customer behavior, inventory forecasting, and market intelligence domains. Strong understanding of data cleaning, SQL analysis, business reporting, and insight generation.

TECHNICAL SKILLS

- **Programming & Analytics:** Python, SQL, Pandas, NumPy
- **Visualization & Reporting:** Power BI, DAX, Excel, Power Query
- **Databases:** MySQL, Google BigQuery
- **Python Libraries:** Openpyxl, SQLAlchemy
- **Data Analysis:** KPI Analysis, Data Cleaning, EDA, Trend Analysis, Forecasting
- **Tools:** GitHub, Jupyter Notebook, VS Code
- **Telecom Tools:** ENM, Nokia NetAct OSS

PROFESSIONAL EXPERIENCE

Ericsson India Pvt Ltd

Network Engineer / Data Operations Analyst

Bengaluru, India

Jan 2024 – Present

- Automated telecom KPI monitoring and operational reporting workflows using Python, reducing repetitive manual tasks and improving reporting efficiency.
- Worked on network health checks, alarm monitoring, zero-traffic analysis, and telecom operational validation processes for Ericsson managed services.
- Built Python-based automation scripts for Excel reporting, KPI analysis, and operational checks used in daily telecom operations.
- Performed data validation and operational analysis using ENM and Nokia NetAct OSS tools across multi-vendor telecom environments.
- Collaborated with operations teams to monitor network performance issues and support troubleshooting activities.

KEY PROJECTS

Inventory Forecasting System

Python, SQL, Prophet, Power BI

- Built an end-to-end inventory forecasting system to predict SKU demand trends, identify inventory risks, and support smarter stock planning decisions.
- Developed forecasting pipelines using Python and Prophet for demand analysis and visualized business insights using Power BI dashboards.

Retail Growth & Customer Intelligence Analysis

BigQuery, SQL, Power BI

- Analyzed 100,000+ real-world e-commerce orders from the Brazilian Olist dataset using Google BigQuery and Power BI.
- Identified logistics inefficiencies, same-day delivery opportunities, VIP customer segments, and revenue growth trends through advanced SQL analysis.
- Applied joins, CTEs, window functions, and time-based analytics for business insight generation.

Customer Shopping Behavior Analysis

Python, MySQL, Power BI

- Analyzed 3,900 customer transactions to uncover customer segmentation patterns, subscription behavior, and revenue-driving trends.
- Built interactive dashboards and business recommendations focused on customer retention, discount dependency, and purchasing behavior analysis.

Global AI Adoption Market Analysis

SQL, Power BI

- Built interactive dashboards analyzing global AI adoption trends, industry growth patterns, and regional market insights.
- Performed data transformation and business intelligence reporting using SQL and Power BI.

EDUCATION

Bachelor of Engineering in Electronics & Communication Engineering

BNM Institute of Technology, Bengaluru
